

information to guide meaningful action to improve health, enhance healthcare quality, and lower costs. The Arkansas APCD team strives to build and maintain a rich data asset to enable this vision and mission, helping advance the health and well-being of Arkansans through relevant, accessible health information.

The Arkansas APCD is based on a logical data platform that associates the five main data categories (member data, medical claims, pharmacy claims, dental claims, and provider data) at both the submitter/individual and provider levels. This model facilitates health data relationships that can address complex health care utilization and access questions.

The Arkansas All-Payer Claims Database (APCD) is administered by the Arkansas Center for Health Improvement (ACHI) with support from the Arkansas Insurance Department Health Insurance Rate Review Division.
